DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7, 8, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamaguchi et al (4,345,558).

As per claims 7 and 11, Yamaguchi discloses:

- determining a power determining signal from a position of an operating element (column 16, lines 23-34);
- filtering the power determining signal with a filter, the filter including at least one high pass filter and at least one low pass filter connected in parallel (figure 13); and
- controlling the actuator element as a function of the filtered power determining signal (column 16, lines 58-61).

As per claims 2 and 8, it is inherent that a pulse corresponds in direction to a direction in change from the signal.

Allowable Subject Matter

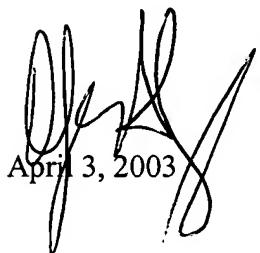

3. Claims 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
